5.0.146

Product Bulletin – Scool360 App with New Features

We're excited to introduce version 5.0.146 of our enhanced Scool360 solution! This latest update is packed with new features crafted to elevate the experience for staff, faculty, and parents alike. Here's a look at what's new:

Aikya Integration

Attendance management is now fully automated by integrating an advanced Facial Recognition Access Control Device. This cutting-edge technology enables schools to:

- Ensure that only authorized students, staff, and visitors can enter with contactless verification
- Automate Attendance management by allowing marking and tracking attendance through the device and sync directly to Scool360.
- Access comprehensive logs and attendance trends via the Report module.

Payment Gateway

Fee payment has been made easy through the Scool360 mobile app by integrating the Cashfree Payment Gateway, which allows,

- Parents to pay school fees instantly via the mobile app, on their mobile phones.
- Parents can pay fees through a variety of payment methods, including UPI, credit/debit cards, net banking, and wallets.
- On successful payment, an invoice will be generated, which can be viewed.

Enhanced Reporting

The Staff Attendance Management feature has been enhanced with a reporting option that generates a consolidated staff attendance report.

- Admin users can select key parameters such as staff type, month, academic year start and end dates
- Generate consolidated staff attendance reports across all staff members, offering actionable insights into attendance patterns.

We believe these updates will significantly enhance the functionality of our Scool360 platform, providing more comprehensive and personalized user experience. We encourage all users to update to the latest version to take advantage of these new features.

For any questions or assistance with the update, please contact our support team.
